Education

CUNY Queens College   Bachelors of Science in Computer Science
GPA: 3.92 / 4.00   Expected Graduation: May 2026
Awards: Presidential Scholar; Dean's List for 2 Years
Relevant Coursework: Object-Oriented Programming in C++ and Java, Computer Architecture, Discrete Structures, Data Structures and Algorithms, Database Systems

Work Experience

- **Queens High School of Teaching - College Bridge Coach**   *August 2022 – August 2023*
  - Collaborated with a multidisciplinary team of College Counselors and College Bridge Coaches to guide students through the college exploration and application process
  - Ensured students completed essential financial aid applications, including FAFSA and TAP, to secure funding for their education
  - Provided summer outreach and support to mitigate student melt and ensure seamless transitions to post-secondary destinations
  - Managed and distributed 167 transcripts to colleges and other post-secondary institutions for current students and alumni
  - Supervised a caseload of 222 high school seniors, tracking their post-secondary plans and providing ongoing guidance to ensure successful outcomes
- **Google's Computer Science Summer Institute - Participant**   *July 2022 - August 2022*
  - Participated in a 4-week intensive computer science summer program for high-achieving students
  - Completed an introductory project-based HTML/CSS and JavaScript curriculum taught by Google engineers
  - Configured 12 individual coding projects in JavaScript by using principal programming concepts
  - Attended product design, resume development, and software engineering interview workshops
  - Delivered a collaborative final project presentation that included a live demonstration to Google employees and community leaders

Projects

- **Mental Health Awareness Website**
  - Co-developed a website focused on raising awareness and providing information about mental health in collaboration with two peers.
  - Designed and implemented a mental health quiz featured on the site, consisting of 54 questions with 9 possible diagnoses to provide personalized insights.
  - Built the website using JavaScript, HTML, and the Bulma CSS framework to ensure a responsive and user-friendly interface.
- **Great And Random Recipe Website**
  - Co-developed a website featuring a diverse collection of recipes, providing users with an interactive and engaging experience.
  - Led the creation of the website's HTML structure and overall design
  - Designed and implemented an online recipe bookstore, allowing users to add books to a virtual cart and view the total cost at checkout.
  - Built the website using JavaScript, HTML, and the Bulma CSS framework to deliver a responsive and efficient platform.

Technical Skills

- **Languages:** Java, C, C++, Python, SQL, MATLAB
- **Web Development**: HTML, CSS, JavaScript, Node.js, React.js, Express.js
